

RF ECO

SINGLE BOOT FITTING

ZJI single-boot sump entry fittings use a single hole installation with embedded bolts to seal off the containment sump pipe entry. Installation is simple, quick and clean. The RF ECO fitting pairs with **ANY** manufactured containment sump and piping for an easy, “ECO”nomical sump-entry solution. Also available with a UV resistant white design boot.

FEATURES

- Made with **ProTex**, a non-urethane, co-polymer material compatible with all fuel types
- No measurable hydrolysis and naturally anti-microbial for significant durability
- Single hole install with embedded stainless bolts for quick install and maximum seal
- 3rd party tested for compatibility to the UL 2447 requirements
- End-of-sump life warranty
